

CM Name:

OM1 Customising Sheet

Use this Cheat Sheet to plan your buttons for your Custom Modes. Buttons labelled are items you cannot change or are best as defaults, such as AF-ON. Some may be best as default in one mode but better changed in a CM such as Hi-Res which is redundant for some genres.

With a plain sheet of paper draw out 4 bubbles, name each one for the Custom Mode and write notes in it for what you want to achieve in each one, for instance Landscapes or Wildlife.

Print up to 4 copies of this sheet, depending how many Custom Modes you want, name it then plan out your settings for buttons, having a plan really helps! Add your notes for the Custom Mode, eg drive mode, focus mode, anything that might help when creating it in camera.

BUTTON	FUNCTION
TOP-LEFT	
RECORD	
ISO	ISO (Default)
AF-ON	AF-ON (Default)
AEL
